COMMENTS/FEEDBACK

## 44) Please provide any additional comments or feedback.

375963: Jay was a very approachable prof and made it in his best interest to gauge interest within the students and their project. Because this class was basically group work for sustainability, Jay made an effort to make sure check in on students with how they were doing. His passion for the curriculum helped students find the drive in their project and he made it feel like anything was possible and they were able to achieve greatness.

367726: Jay is the perfect example of an individual who is meant to be a professor. He is an incredible person who not only loves what he is doing, but also helps students to get excited and more involved in the class work. He is very respectful towards all students. He uses his sense of humour and knowledge to lead his presentations - I have nothing negative to say about Jay. I wish I had him as a prof for more of my classes.

373407: Jay Maillet is an exceptional instructor. It is evident that he is committed to the themes presented in ENVS 401 course. His style of instructing enhanced the value of the course for me.

373484: Jay is awesome!

370861: You and Colin are a killer team! Thank you so much for taking the time to make sure we were all understanding material and the course goals. So refreshing to have two professors who seem to care about their students. Honestly such a pleasure.

368746: Jay is an excellent instructor. I like his class.

371164: Jay was awesome. He came to class everyday and was always eager to talk to students, to find out how their projects were going and offered to help with anything they needed. He was enthusiastic about the course and the few topics that it taught. He is very friendly and truly wanted to get to know all of the students. The questions included in this survey do not really apply to the majority of the course based on its layout so it is hard to accurately use the answer to evaluate the course and its subject material.

371313: ENVS 401 is unlike any class I have taken before, encouraging individual ideas and creativity with limited instructor based learning. This course has prepared myself and my other classmates well for our lives and careers outside of school. It might be a good class to extend into 2 terms as it was difficult to for groups to make as much progress as we hoped with the limited time provided in the scope of this course. Our instructors were great! Jay was always available for encouragement and he was a knowledgeable resource to turn to when we needed help breaking down a problem. He clearly cares about each student and group and provided great feedback on all assignments.

372245: Jay is very passionate and went above and beyond providing valuable feedback and assistance within this class

372250: Jay was always available over email for feedback, and he checked in regularly with all the groups to see how they were doing. There was always a sense that he would be willing to help with any part of our projects.

370291: Jay needs to work on how he delivers materials and feedback, I found his lectures really boring and very obviously unrehearsed. I think Jay is a good TA and with some work, he will be a great professor!

375873: I know the class is built so there isn't a formal instructive atmosphere, however there are assignments. It would be nice to see the expectations for these assignments better laid out and the purpose of these assignments better explained. If students are to be graded expectations should be understood.

367011: Jay mostly does the lecturing/explanations in class. He also is usually the one to provide feedback on assignments, which I believe to be quite helpful. You can tell that he is very enthusiastic about the course, but he doesn't really involve himself with the students' projects as a helpful person.

371884: Jay was great. Super approachable and passionate. He deserves a class on his own!

371896: Jay is a great instructor. He's very enthusiastic and excited to teach

367053: It blows my mind that SENS decided it was a good idea to have four men teach a class on sustainability. Plus most days it really felt like some of them were just trying to get their hours in for a lecture requirement. I just didn't feel like they all brought very useful skills to the table, that Jay couldn't have done on his own.

372884: Jay is a god instructor who gave lots of constructive feedback on assignments. he facilitated class discussion when it applied to the course (course is mostly group work).

374033: Thank you for everything you have done for this class Jay! I know all of us greatly appreciated you being the person who did all the behind scenes and upfront work. I think without you the class would have been a little disorganized. Have a great summer!

374654: Jay was an excellent instructor. He was always there whenever we had questions and always had very good advise when needed. He was very welcoming and approachable. Any assignments submitted were thoroughly graded and he always provided good feedback. Jay is one of the best instructors I have ever had and is very competent in his field. He was extremely approachable and understanding and always helped students to understand what was being taut and strive for our best.
